

VAN DER VALK

KliMax

Slide system

The KliMax Compact slide system from Van der Valk Horti Systems has evolved through its faultless functionality into the standard in its field. With 3, 6 or 9 kg of resistance, it is the most powerful system available. It effortlessly compensates for the expansion and contraction of your greenhouse by ensuring a firm seal of your screen all around. It pulls the screen open to form the smallest possible package. And it ensures extremely uniform ventilation slits to allow moisture to escape. The KliMax Compact system offers you energy savings, more light and an even and controllable greenhouse climate. In addition, KliMax guarantees controlled forces exerted on the greenhouse structure, which is not a superfluous luxury given the continuously increasing height and length of greenhouses and the number of screens.

Energy savings

Perfectly suited to retensioning motors

- ✓ Allows your screen to adjust 24 hours a day to the expansion and contraction of the greenhouse
- ✓ Prevents gaps in the screens through retensioning
- ✓ Aligning screen profiles first for uniform openings to allow moisture to escape or even dissipation of heat

Increase of light

The most powerful of its kind with 3, 6 or 9 kg of resistance

- ✓ With controlled force creating the smallest screen package
- ✓ Maximum amount of light due to compact construction

NEW!

Versatility

Perfection in every situation

- ✓ KliMax Slide:
 - Prevents tension in the screen drive system
 - Shortens the installation time (expansion axes are no longer needed)
 - Low maintenance

KliMax: perfect in every situation

Versatility

The KliMax Compact slip system with 3, 6 or 9 kilo resistance is the most powerful system there is. The different resistances can be recognised by the colour of the spring: **green = 3 kg** **natural = 6 kg** **red = 9 kg**

There are 4 different types:

✓ for standard screen systems

✓ with anodised aluminium tube

✓ for fixing on a tube 19 (mm)

✓ prevents tension in the screen drive system
 ✓ shortens the installation time
 (expansion axes are no longer needed)
 ✓ low maintenance

WHY VAN DER VALK HORTI SYSTEMS?

- Globally, the only specialised company that focuses completely on the development and production of vent-opening systems and screen systems
- Engineering and production in house
- Innovative systems with distinctive advantages for the grower
- Rapid and reliable deliveries thanks to modern machine park and large stocks
- Technical, commercial and project support from enthusiastic employees
- Fast, efficient mounting thanks to unique, well-designed and high-quality components
- System supplier since 1963

DEVELOPER AND PRODUCER OF VENTILATION MECHANISMS AND SCREEN SYSTEMS
